Based on the download, you may be interested in these articles and related software titles. File Size: 1.43MB Windows Explorer is too boring? Color it! Assign any color to any folder just right-click the folder and select colorize! It supports its own colors, labels, and works seamlessly with any version of Windows. &#x2013; Compatible with Windows 7, Vista and XP 4.1 Rated By 7 Users Platform: Windows (All Versions) Publisher: FindMySoft Editor's Review Folder Colorizer - Change folder colors All folder icons look the same and can make it difficult to locate a particular folder in a long list. Although it is possible to change the folder icon, the Colorizer folder offers a simpler solution. As the name suggests, this application allows you to change the colors of folder icons. The best part is that it allows you to change the colors of folders immediately, without interacting with any complex menu. The Colorizer folder is completely free and is available for Windows XP, Vista, Win 7 and Win 8. It only takes a few seconds to install the application. The Setup Wizard will guide you through a few simple settings, but it will also suggest a series of additional tools, so don't rush blindly through the process unless you want to find new toolbars in your browser. In addition to the color selection panel, the application does not have a user interface and does not need to run it through an executable file. All you have to do is complete the installation process. Once installed, Folder Colorizer adds new options to the Windows Explorer context menu. To change the color of a folder, right-click the folder and select a color in the submenu. Colors change almost instantly, without further user input. The application places several default colors at your disposal, but you can define new ones on the above-mentioned color selection panel. You can access the color selection panel by using the options in the same submenu. You can select new colors on the color wheel and save them by clicking the button. The application will display the name of the selected color automatically and you can change it if you want. You can restore folder colors at any time by simply selecting the appropriate option in the Colorizer folder submenu. Pros: You can change the color of the folder icon by using the options in the Windows Explorer context menu. Colors change almost instantly, without further user input. In addition, the application allows you to select and save any color you want. Disadvantages: You need to be careful during the installation process if you do not want any additional toolbars in your web browser. With Folder Colorizer, you can highlight any folder in Windows Explorer with nothing more than a few clicks. You can download Colorizer Folder for free here.
